Since 1969

Founded in 1969 by Jacques Segura, the Furygan brand was forged with passion, commitment and a culture of excellence. At the age of 14, Jacques Segura was already working with leather in every way, eager to learn, going from shoes to gloves with the same dexterity as his parents craftsmanship.

This spirit of innovation, this passion for leather work, this avidity for all the technical and technological advances that can improve the daily life of motorcyclists, but above all this a will to never compromise when dealing with safety, are the fundamentals of the company. These values are perpetuated today by David Segura, his son, who, by initiating the turn to textiles and continuing to modernise the company, has anchored the brand's position.

Furygan, today and tomorrow

Our experience is valuable, it shapes the company's culture. With its know-how, Furygan has evolved and refocused on its core business: the development and manufacture of technical clothing for motorised two-wheelers. Today, Furygan is the leader of the French market and is growing internationally. Furygan is involved in the protection of motorcyclists whatever their riding style, on the road, on the track or off the beaten track.

Technology and know-how

Furygan has been a leather specialist since the beginning and has been present in racing at the highest level. It has developed while remaining a French and family company. Far from being a handicap, this structure has allowed us to successfully integrate new materials and technologies, or the most recent safety standards.

And our head office, located in Nîmes since the creation of Furygan, is now home to an internal research and development Laboratory, the Furygan MotionLAB, it remains above all a real production site, a factory which preserves our most precious heritage: our know-how. We still have a production site in Nîmes. It includes a leather tracing and cutting unit for mass-produced products, as well as a clothing workshop. The latter allows us to produce all custom-made suits, but also to ensure the prototyping of tomorrow's garments, as well as offering a qualified after-sales service for the repair of your Furygan products.

SINCE 1969, WE PUSH FORWARD.

Furygan X inemotion AIRBAGS

For more than 55 years, Furygan has been innovating, investing and designing the best protective clothing for motorised two-wheeler users.

In partnership with In&motion, French designer of airbag systems, Furygan is launching a new range of airbag vests, compatible with all motorcycle jackets, whatever their brand.

First tested by our riders on the Dakar and in MotoGP, In&Motion technology is now available in a range of high-performance, easy-to-wear products. Ultra-ventilated, light and comfortable, the Fury Airbag Evo and Fury Airbag Evolution+ are suitable for all motorcyclists, for everyday protection as well as at the highest level in competition.

30H

Up to 30 hours of riding autonomy.

0,06S

Detection + inflation in less than 0.06s.

5

custom detection modes:

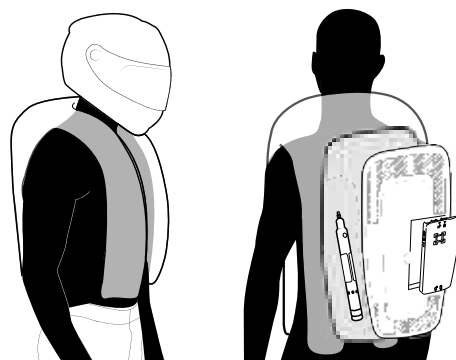

Road Track Adventure
Adventure Race Motocross

5

Up to 5 inflations possible before the airbag cushion is replaced.

IN&BOX

MEMBERSHIP AND SUBSCRIPTION, HOW DOES IT WORK?

1. PURCHASE YOUR FURY AIRBAG
from your favourite retailer.

2. ORDER THE IN&BOX
on my.inemotion.com and take out a subscription.

Several options available:

REVOLUTION
In&box rental offer at €12/month or €120/year.

CLASSIQUE
Offer to purchase the In&box at €400.

TRACK and ADVENTURE
options at €8/month or €25/year each.

5 possible detection modes
(Road, Track, Adventure, Adventure Race, Motocross).
One detection mode of your choice included with the In&box. Other modes can be added for €8/month or €25/year each.

3. ACTIVATE THE IN&BOX
by downloading the «My In&box» application, available on iOS and Android.

FURY AIRBAG EVO

● Black / 7806-1

369,9 €

XS - 4XL

GOOD TO KNOW

- › The lightest electronic airbag ever designed by Furygan.
- › Percentage of ventilated surface: 100%.
- › In&motion subscription required. Go to shop. inemotion.com
- › The first inflator is included with the airbag.
- › In&box recharge time: 2 hours.
- › Approved by the FIM for use in all short circuits championships except MotoGP and JuniorGP.

THE FURY AIRBAG EVO PROTECTS:

- 1 Neck
- 2 Chest
- 3 Spine
- 4 Abdomen

+ L1 back protector included.

A new step in motorcycle protection, the Fury Airbag EVO redefines market standards. Still powered by intelligent, self-learning In&motion technology, its protection performance has been enhanced by a new inflation pocket. Its featherweight, slimness and ultra-ventilation make it the benchmark for the market. Active protection that's as discreet as it is high-performance.

PROTECTION

In&Motion back protector included. Level 1.

New-generation inflatable pouch. Up to 5 inflations before a factory check is required.

In&motion Protect. 4 zones of protection. The Furygan airbag waistcoat protects the neck, chest, abdomen and spine.

Shaping effect. Limits the displacement of organs when falling.

In&motion Detect. 3 accelerometers, 3 gyroscopes and a GPS power an inertial unit capable of more than 1,000 calculations per second.

In&motion Perfect. 5 algorithms constantly enhanced by feedback from users enable a fall to be detected and triggered in less than 0.06 seconds.

5 detection modes. The only airbag technology with 5 specific detection modes (road, track, adventure, motocross, adventure race).

ERGONOMICS

Autonomous change of inflator after a trigger. This can be done in less than a minute by the user.

Self-locking zip puller. Locks the zip in the down position. This pull tab, specifically designed for Furygan airbags, has an automatic folding system to secure the closure of the waistcoat in all circumstances.

«My In&box.» Mobile application dedicated to In&box control. Access all the system information and select the detection mode best suited to your needs.

Up to 30 hours continuous driving autonomy.

Ultra stretchable sides. To allow a perfect fit thanks to its superior elasticity.

CLIMATE

Mesh. The Mesh, present in large panels and optimally placed, allows for increased airflow through the garment, and maximum breathability.

Mesh 3D liner. 3D Mesh limits the creation of a thermal bridge. This ventilated insulation helps maintain a constant temperature inside the garment, whether it is hot or cold outside.

100% ventilated. Mesh and 3D mesh composition with excellent air circulation properties, good cushioning and quick-drying capabilities.

MATERIALS

Mesh.

Airmesh. Three-dimensional synthetic fabric with excellent airflow properties, good cushioning and quick drying capabilities.

THE FURY AIRBAG EVOLUTION+ PROTECTS:

- 1 Neck
- 2 Chest
- 3 Spine
- 4 Abdomen

+ L2 back protector included.

The Fury Airbag Evolution+ combines all the benefits of the Fury Airbag EVO with the Furygan In&Out concept to create this '+' version, which can be used under or over your motorbike clothing. A new step in biker protection, this evolution of our abrasion-resistant airbag waistcoat, enhanced by a level 2 D30® back protector, redefines market standards.

PROTECTION

New-generation inflatable pouch. Up to 5 inflations before a factory check is required.

In&motion Protect. 4 zones of protection. The Furygan airbag waistcoat protects the neck, chest, abdomen and spine.

Shaping effect. Limits the displacement of organs when falling.

In&motion Detect. 3 accelerometers, 3 gyroscopes and a GPS power an inertial unit capable of more than 1,000 calculations per second.

In&motion Perfect. 5 algorithms constantly enhanced by feedback from users enable a fall to be detected and triggered in less than 0.06 seconds.

5 detection modes. The only airbag technology with 5 specific detection modes (road, track, adventure, motocross, adventure race).

Level 2 D30® back protector included. Level 2 back protection specifically designed for the Fury Airbag Evolution+, it fits perfectly and is positioned precisely on your back. Vented design provides superior airflow.

ERGONOMICS

In&Out Airbag Concept. The In&Out design allows you to wear your airbag under or over your certified motorbike clothing. EN17092 C U/O approval guarantees equivalent abrasion resistance of at least level A in the areas covered.

Autonomous change of inflator after a trigger. This can be done in less than a minute by the user.

Self-locking zip puller. Locks the zip in the down position. This pull tab, specifically designed for Furygan airbags, has an automatic folding system to secure the closure of the waistcoat in all circumstances.

«My In&box.» Mobile application dedicated to In&box control. Access all the system information and select the detection mode best suited to your needs.

KID EVO SUIT

• Black-blue-white / 6544-116

519,9 €

6 - 12 years old

The Combi Kid Evo suit has been optimised and developed just like the adult version, because all riders, no matter what their age, deserve the best.

PROTECTION

Back protector pocket. Designed to fit the Furygan D30® back protectors.
High quality leather. Constructed from leather selected for its strength and thickness, this product has been designed to offer high abrasion resistance and true durability.
Triple stitching. A sewing technique for creating extremely tear and abrasion resistant seams, where a fold of material protects the main thread.
D30® shoulder, knee and elbow protectors. D30® is a very soft material where molecules lock in the event of an impact to absorb kinetic energy. This technology makes it possible to create soft, ergonomic and top performing protectors for more security and comfort.
Aramid fibres with padded reinforcements at the bottom. Lightweight and heat resistant, Aramid fibre strengthens the materials it is used with against abrasion, and slows down heat transfer to the skin.

ERGONOMICS

Large stretch panels on the bust. To fit your body perfectly.
Gussets behind the shoulders. For increased comfort and mobility when you get into the riding position.
Comfort Zones. Stretchable material between the legs, above the knees and the kidneys for better fit and comfort.
Neoprene inserts at the collar and on the wrists. For increased comfort.
Knee and elbow sliders. Developed to reduce the weight and optimise the contact surface without degrading the longevity nor the feeling with the track surface.

CLIMATE

Light and breathable fixed lining.

MATERIALS

Cow leather.
High tenacity bi-stretch inserts. A material that is both resistant and elastic, strategically placed to maintain ease and comfort during the movements necessary for proper handling of a powered two-wheeler.
Aramid fibres. Lightweight and heat resistant, Aramid fibre strengthens the materials it is used with against abrasion, and slows down heat transfer to the skin.

Furygan has once again set new standards for track suits with the Eclipse X Kevlar®. This suit is designed to push the limits of performance, allowing riders to beat their best lap time on the track. It has been developed in collaboration with the Furygan Racing Service, incorporating the best innovations from MotoGP, WSBK, and the Tourist Trophy, guided by competition R&D.

PROTECTION

Kevlar® reinforcements and double leather layers. At the hips, seat and forearms.

Compatible with the airbag vests using the In&motion technology.

Chest protector pockets. Designed to fit the Furygan D30® chest protectors.

High quality leather. Constructed from leather selected for its strength and thickness, this product has been designed to offer high abrasion resistance and true durability.

Triple stitching. A sewing technique for creating extremely tear and abrasion resistant seams, where a fold of material protects the main thread.

External shells on the shoulders and the knees.

D30® level 2 RACE knee protectors.

D30® level 2 RACE elbow protectors. Developed in competition, these protectors are designed to meet the demands of intensive riding, creating an extended coverage zone, as well as first-rate ergonomics, ventilation and flexibility.

D30® shoulder protectors.

D30® hip protectors.

ERGONOMICS

Pocket for hydration system. Designed for the insertion of a hydration bag, as well as the passage and retention of hoses. Holds up to 3 litres.

Aerodynamic speed hump GP Specs. New aerodynamic speed hump, result of tests and wind tunnel studies with our World Superbike and MotoGP riders, to optimise drag and comfort in the speed position.

Removable liner.

Ergonomics derived from Racing. Design based on the ergonomics developed for our world's best racers.

Gussets behind the shoulders. For increased comfort and mobility when you get into the riding position.

Neoprene inserts at the collar and on the wrists. For increased comfort.

Morpho-stretch panels. To fit your body perfectly. The shape of the high tenacity bi-stretch inserts positioned on the arms is the result of our experiments in competition, facilitating movement and optimising comfort.

Knee and elbow sliders. Developed to reduce the weight and optimise the contact surface without degrading the longevity nor the feeling with the track surface.

CLIMATE

Selected perforated areas. For excellent air circulation during high-temperature rides, without compromising safety, the perforated areas have been optimised and carefully placed.

MATERIALS

Cow leather.

High tenacity bi-stretch inserts. A material that is both resistant and elastic, strategically placed to maintain ease and comfort during the movements necessary for proper handling of a powered two-wheeler.

Neoprene. A layered assembly of two soft-touch technical materials for a soft, warm and windproof outer shell. Unparalleled comfort.

Kevlar® fibre reinforcements.

LIVIO X KEVLAR®

AW25

● Black-white / 6474-143

169,9 €
S - 4XL

● Black-red
6474-108
SS26

GOOD
TO KNOW

› The outside pockets are secured by a zip.

The Livio X Kevlar® is a hoodie that hides its secrets: a streetwear look that's loose and comfortable, combined with real protective equipment by Furygan MotionLAB. Kevlar® reinforcements, D30® shoulder and elbow protection in addition to abrasion-resistant fabric, has led to the Livio X Kevlar® being awarded AA CE Certification - an incredible achievement for such a motorcycling sweater style jacket.

PROTECTION

Back protector pocket. Designed to fit the Furygan D30® back protectors.

Chest protector pockets. Designed to fit the Furygan D30® chest protectors.

Furygan Skin Protect lining. A three-material design, studied to strategically optimise the resistance of the areas most stressed during a fall, while preserving comfort.

D30® shoulder and elbow protectors. D30® is a very soft material where molecules lock in the event of an impact to absorb kinetic energy. This technology makes it possible to create soft, ergonomic and top performing protectors for more security and comfort.

Padded reinforcements made with Kevlar® fibres at the elbows and shoulders. A fabric that remains comfortable - thanks to the cotton - which slows down heat transfer during abrasion. Another benefit is that it increases the overall abrasion resistancy of other materials it is used with.

ERGONOMICS

4 pockets. 2 outside and 2 inside (wallet pockets).

CLIMATE

Padded fixed lining. Reinforces and protects against the coolness created by movement when riding a powered two-wheeler.

MATERIALS

Cotton.

Polyester.

Polyamide. Known for its resistance to abrasion and tearing, polyamide is the material of choice for protective clothing for motorbike users.

Kevlar® fibre reinforcements.

FuryTECH

Furygan X **PRIMALOFT®**

Furygan has developed a technological partnership with PrimaLoft®, widely considered to be the best performing synthetic wadding on the market.

PrimaLoft® is comfortable and keeps bikers warm and dry in variable weather conditions.

Furygan has expanded its range to include two insulations that meet specific requirements: PrimaLoft® Black, which contains 100% recycled materials, and PrimaLoft® Gold, designed for the most extreme conditions.

To learn more about our partner scan the code.

THERMAL INSULATION.

PrimaLoft® is made from ultra-fine fibres designed to trap heat. The immediate effect is to keep the body thermoregulated and at 100% of its capacity - from winter to spring, from the coldest destinations to home.

HYDROPHOBIC

PrimaLoft® wadding is created with intrinsically hydrophobic fibres that repel water. PrimaLoft® keeps you dry and will also dry very quickly in the event of prolonged exposure.

SOFT AND COMFORTABLE

PrimaLoft fibres are thinner than a human hair, making them incredibly soft. They offer an unprecedented feeling of comfort for a perfect ride in all conditions.

DURABLE

PrimaLoft® engineers develop materials designed to survive the rigours of military use. Coupled with resistance tests carried out by the Furygan Motion Lab, PrimaLoft®-equipped products are made to withstand the elements and the test of time.

RESPONSIBLE

PrimaLoft® insulation in the Furygan range is Bluesign®, GRS (Global Recycled Standard) and OEKO-TEX standard 100 certified.

**GOOD

Waterproof inner pocket. Easy to access, this waterproof pocket is ideal for keeping your personal items dry and close at hand.

Waist adjuster tabs. For a precise adjustment to your body shape.

5 pockets. 2 outside and 3 inside.

CLIMATE

Water-repellent material. This product slows down the infiltration of humidity and limits the creation of a thermal bridge that would accelerate the transfer of the cold to the body.

MATERIALS

3 layer softshell fabric. This 3-layer fabric is waterproof and windproof, without compromising on comfort. Flexible and breathable, it promotes freedom of movement without compromising the rider's protection and while preserving body heat in all conditions.

GOOD TO KNOW

› If you like the look of the Mystic Evo, but want to be cooler in the summer, it is available in a ventilated summer version.

MYSTIC EVO

● Black-white / 6410-143

179,9 €
S - 2XL

● Black-white-pink
6410-1027

With its punchy style, the arresting Furygan Mystic Evo makes you want to get riding. You'll be turning heads, that's for sure. But it also sports all the key features needed in a bike jacket.

PROTECTION

Back protector pocket. Designed to fit the Furygan D30® back protectors.

D30® shoulder and elbow protectors. D30® is a very soft material where molecules lock in the event of an impact to absorb kinetic energy. This technology makes it possible to create soft, ergonomic and top performing protectors for more security and comfort.

ERGONOMICS

4 pockets. 2 outside and 2 inside (wallet pockets).

Trouser belt connecting snap loops.

Hip adjustment zippers.

CLIMATE

Waterproof membrane.

BUD EVO 3

● Black-white / 6007-143

329,9 €
36 - 50

The Bud Evo leather trousers are a major product of the Furygan range. In this latest evolution, featuring a striking new style, they prove again to have everything you can expect from a «must have» product and are perfect for any journey or track day on your bike.

PROTECTION

High quality leather. Constructed from leather selected for its strength and thickness, this product has been designed to offer high abrasion resistance and true durability.

Triple stitching. A sewing technique for creating extremely tear and abrasion resistant seams, where a fold of material protects the main thread.

D30® knee and hip protectors. D30® is a very soft material where molecules lock in the event of an impact to absorb kinetic energy. This technology makes it possible to create soft, ergonomic and top performing protectors for more security and comfort.

ERGONOMICS

Numerous stretch zones. Stretchable material between the legs, above the knees and the seat for better fit and comfort.

Knee sliders. Developed to reduce the weight and optimise the contact surface without degrading the longevity nor the feeling with the track surface.

Jacket connecting zip. Furygan jacket to trouser zip connector on all leather and textile compatible products.

CLIMATE

Raised back belt. For more comfort, warmth and protection on the kidneys when riding.

Light and breathable fixed lining.

MATERIALS

Cow leather.

High tenacity bi-stretch inserts. A material that is both resistant and elastic, strategically placed to maintain ease and comfort during the movements necessary for proper handling of a powered two-wheeler.

Cow Leather

● Black / 6046-1

359,9 €
36 - 50

Have you opted for the Ghost Evo jacket? Put on the trousers that will allow you to create a perfect ensemble in every respect, from style to performance.

PROTECTION

High quality leather. Constructed from leather selected for its strength and thickness, this product has been designed to offer high abrasion resistance and true durability.

Padded reinforcements made with Kevlar® fibres at the bottom. A fabric that remains comfortable - thanks to the cotton - which slows down heat transfer during abrasion. Another benefit is that it increases the overall abrasion resistancy of other materials it is used with.

D30® level 2 RACE knee protectors. Developed in competition, these protectors offer an asymmetrical profile designed to meet the demands of intensive riding, creating an extended coverage zone, as well as first-rate ergonomics, ventilation and flexibility.

D30® hip protectors. D30® is a very soft material where molecules lock in the event of an impact to absorb kinetic energy. This technology makes it possible to create soft, ergonomic and top performing protectors for more security and comfort.

External shells on the knees.

ERGONOMICS

Numerous stretch zones. Stretchable material between the legs, above the knees and the seat for better fit and comfort.

Knee sliders. Developed to reduce the weight and optimise the contact surface without degrading the longevity nor the feeling with the track surface.

Ergonomics derived from Racing. Design based on the ergonomics developed for our world's best racers.

Jacket connecting zip. Furygan jacket to trouser zip connector on all leather and textile compatible products.

CLIMATE

Raised back belt. For more comfort, warmth and protection on the kidneys when riding.

Light and breathable fixed lining.

MATERIALS

Cow leather.

Double face interlock made with cotton and Kevlar® fibres. A fabric that remains comfortable - thanks to the cotton - which slows down heat transfer during abrasion. Another benefit is that it increases the overall abrasion resistancy of other materials it is used with.

High tenacity bi-stretch inserts. A material that is both resistant and elastic, strategically placed to maintain ease and comfort during the movements necessary for proper handling of a powered two-wheeler.

S - 3XL

Designed to accompany the Challenger 3C PrimaLoft® jacket, the Redington 3C PrimaLoft® trousers take up the challenge of adapting to all weather conditions in the blink of an eye. Whether you're facing extreme heat, torrential rain or polar cold, the Redington 3C PrimaLoft® has everything under control thanks to its three-layer laminate technology, complemented by AFS max and a removable PrimaLoft® thermal lining.

PROTECTION

D30® knee and hip protectors. D30® is a very soft material where molecules lock in the event of an impact to absorb kinetic energy. This technology makes it possible to create soft, ergonomic and top performing protectors for more security and comfort.

ERGONOMICS

Removable shoulder straps.

Multiple adjuster tabs. To fit all body shapes and sizes.

Easy fit opening. An adjustable opening at the bottom of the legs allows for an easy and precise fit with your boots.

Comfort Zones. Stretchable material between the legs, above the knees and the kidneys for better fit and comfort.

Tapered cut.

5 outside pockets.

Jacket connecting zip.

CLIMATE

AFS Max. Air Flow System Max, an adjustable ventilation system for extended air flow in the garment.

PrimaLoft® Black padding. The PrimaLoft® family of insulation products is widely regarded as the best performing on the market, offering comfort and protection in a variety of climatic conditions. PrimaLoft® Black insulation contains 100% recycled material.

Furygan DRYCORE Pro. Developed by the Furygan MotionLAB, DRYCORE technology protects motorcyclists from the elements. DRYCORE Pro embodies the highest level of our expertise: maximum protection, exceptional breathability and premium materials dedicated to extreme conditions.

Waterproof and breathable. Thanks to its lightweight, flexible and high-performance 3-layer laminated outer material. Performances : 20k/10k.

Light and breathable fixed lining.

Integral removable thermal liner. Lining covering all of the legs.

MATERIALS

High tenacity 3 layer laminated polyester.

High tenacity Polyamide, water repellant treated.

PFC free outer shell. While maintaining performance and durability, the water repellent treatment of this product has been designed to be environmentally friendly.

100% recycled outer fabric.

- › The ergonomic design of the belt, its shape and materials make it a decisive element for comfort in all riding phases and conditions.
- › Also available in a man version.

SOFTSHELL PANT LADY

• Black / 6473-1

159,9 €
S - 2XL

“Versatility” is the key word that guided the development of these trousers. From the choice of materials, to the ergonomic care, to the modularity and comfort, everything has been screened for versatility. The result is a waterproof, windproof and breathable pant that will prove to be formidable in all circumstances.

PROTECTION

Reflective inserts.

Furygan Skin Protect lining. A three-material design, studied to strategically optimise the resistance of the areas most stressed during a fall, while preserving comfort.

D30® knee and hip protectors. D30® is a very soft material where molecules lock in the event of an impact to absorb kinetic energy. This technology makes it possible to create soft, ergonomic and top performing protectors for more security and comfort.

ERGONOMICS

Waist adjuster tabs. For a precise adjustment to your body shape.

4 outside pockets.

Easy fit opening. An adjustable opening at the bottom of the legs allows for an easy and precise fit with your boots.

Adjustable knee protectors.

Waist stretch. Allows for an optimal adjustment to your body shape.

CLIMATE

Waterproof and breathable Humax® membrane. Inserted in the heart of the garment, our Humax® membrane keeps you dry, while contributing to the clearance of moisture generated by your body. Performances : 10k/15k.

Raised back belt. For more comfort, warmth and protection on the kidneys when riding.

Integral removable thermal liner. Lining covering all of the legs.

MATERIALS

3 layer softshell fabric. This 3-layer fabric is waterproof and windproof, without compromising on comfort. Flexible and breathable, it promotes freedom of movement without compromising the rider's protection and while preserving body heat in all conditions.

Waterproof Breathable

• Black-grey
6495-127

• Grey-Pearl-Red
6495-933

The ultimate adventure pant from Furygan. The Killington Lady is compatible with all the jackets in our touring and adventure range. Together, they form a technical and stylistic continuum for a perfect combination. Featuring: D30® hip and knee protection, ultra-resistant polyester outer fabric, AFS ventilation, waterproof membrane and removable thermal lining.

PROTECTION

D30® knee and hip protectors. D30® is a very soft material where molecules lock in the event of an impact to absorb kinetic energy. This technology makes it possible to create soft, ergonomic and top performing protectors for more security and comfort.

ERGONOMICS

Waist adjuster tabs. For a precise adjustment to your body shape.

3 pockets.

Removable shoulder straps.

Numerous stretch zones. Stretchable material between the legs, above the knees and the seat for better fit and comfort.

Easy fit opening. An adjustable opening at the bottom of the legs allows for an easy and precise fit with your boots.

Jacket connecting zip. Furygan jacket to trouser zip connector on all leather and textile compatible products.

CLIMATE

Waterproof and breathable Humax® membrane. Inserted in the heart of the garment, our Humax® membrane keeps you dry, while contributing to the clearance of moisture generated by your body. Performances : 10k/15k.

AFS ventilation system. Products that include the label «Air Flow System» have been designed to create and channel the flow of air into a garment or glove in order to provide effective ventilation when temperatures rise.

Integral removable thermal liner. Lining covering all of the legs.

MATERIALS

High tenacity Polyester. Polyester with a weight of 600 deniers or more (thin tights weigh about 10 deniers). With at least one coating to hold the fibres together, PHT offers greater resistance than standard polyester.

High tenacity bi-stretch inserts. A material that is both resistant and elastic, strategically placed to maintain ease and comfort during the movements necessary for proper handling of a powered two-wheeler.

GOOD
TO KNOW

› Because Denim was created in Nîmes, this “De Nîmes” range marks the historical link between the brand and its pioneering origins.

› The new cut is straighter and more masculine on the hip, it provides more room for the thighs and gives the space needed to wear boots.

We all know that sudden urge to ride a motorcycle, whether to go to work or to treat ourselves to a daily dose of freedom. The D03 is a simple and effective motorcycle jean that will protect you on each of your outings. It is equipped with D30® protectors on the hips and knees - the most efficient on the market - and an aramid fibre reinforcement on the seat. Its tapered cut, designed by our designers for everyday use, ensures comfortable wearing, in a sober style.

PROTECTION

D30® knee and hip protectors. D30® is a very soft material where molecules lock in the event of an impact to absorb kinetic energy. This technology makes it possible to create soft, ergonomic and top performing protectors for more security and comfort.

Aramid fibres with padded reinforcements at the bottom. Lightweight and heat resistant, Aramid fibre strengthens the materials it is used with against abrasion, and slows down heat transfer to the skin.

ERGONOMICS

Button fly.

Adjustable knee protectors.

Tapered cut. This cut starts out loose in the pelvis and narrows towards the bottom. Maintains the comfort that is essential for two-wheelers, while at the same time enhancing the silhouette.

Stretchable material. For maximum ease of movement on your bike, and in everyday life.

5 outside pockets.

CLIMATE

Mono layer external construction. Allowing better air flow in summer.

Denim. Denim is a comfortable fabric in summer, which lets the air pass through without exposing your legs. Furygan denim jeans have been enhanced with different protection technologies to give you enhanced performances in case of a fall.

MATERIALS

Stretchable cotton denim.

Aramid fibres. Lightweight and heat resistant, Aramid fibre strengthens the materials it is used with against abrasion, and slows down heat transfer to the skin.

Tapered cut

**GOOD
TO KNOW**

- › A timeless straight “501” cut.
- › Because Denim was created in Nîmes, this “De Nîmes” range marks the historical link between the brand and its pioneering origins.

D12 X KEVLAR® STRAIGHT

● New dirty / 6651-583

189,9 €

US26/L30 - US40/L34

- Black 6651-1
- Grey 6651-9
- Medium blue 6651-580

D12 x Kevlar® is the classic of the Furygan range. Inspired by iconic urban models, it incorporates our protective know-how. Reinforced with Kevlar®, with a modern straight cut in multiple washes of colour and invisible D30® Ghost™ protectors, a subtle look that fits both everyday life and riding a motorcycle.

PROTECTION

D30® Ghost™ knee and hip protectors. Designed as fit and forget armour, the D30® Ghost™ is made with the revolutionary new Impact Print™ technology from D30® which allows for unrivalled freeform geometry and flexibility.

Padded reinforcements made with Kevlar® fibres at the bottom. A fabric that remains comfortable - thanks to the cotton - which slows down heat transfer during abrasion. Another benefit is that it increases the overall abrasion resistancy of other materials it is used with.

ERGONOMICS

Button fly.

Adjustable knee protectors.

Straight cut. The straight cut is designed to be comfortable in all circumstances, and to fit most body types. The cut is straight on the entire leg without tightening at the bottom, which facilitates the insertion of boots.

Stretchable material. For maximum ease of movement on your bike, and in everyday life.

5 outside pockets.

CLIMATE

Denim. Denim is a comfortable fabric in summer, which lets the air pass through without exposing your legs. Furygan denim jeans have been enhanced with different protection technologies to give you enhanced performances in case of a fall.

MATERIALS

Stretchable cotton denim.

Double face interlock made with cotton and Kevlar® fibres. A fabric that remains comfortable - thanks to the cotton - which slows down heat transfer during abrasion. Another benefit is that it increases the overall abrasion resistancy of other materials it is used with.

KALVIN X KEVLAR® SLIM

● Dark blue / 6654-582

209,9 €

US26/L30 - US40/L34

For a clean, body-hugging look, Calvin x Kevlar® is an essential choice. Single-layer technology and D30® Ghost™ protectors provide both protection and elegance. Designed in France, our slim cut has been optimised for motorcycle use and enriched with a dart on the knee, to avoid excess material when the leg is bent. Its raw-colored stretch material will develop a patina over the course of your outings, to reveal your style that's always on the move.

PROTECTION

D30® Ghost™ knee and hip protectors. Designed as fit and forget armour, the D30® Ghost™ is made with the revolutionary new Impact Print™ technology from D30® which allows for unrivalled freeform geometry and flexibility.

Kevlar®. Tough external material built in partnership with Kevlar®.

ERGONOMICS

Button fly.

Adjustable knee protectors.

Slim cut. A close-fitting cut that remains comfortable thanks to the stretch in the denim. It fits the hips, moulds to the thighs and becomes narrower at the ankles.

Stretchable material. For maximum ease of movement on your bike, and in everyday life.

5 outside pockets.

CLIMATE

Mono layer external construction. Allowing better air flow in summer.

Denim. Denim is a comfortable fabric in summer, which lets the air pass through without exposing your legs. Furygan denim jeans have been enhanced with different protection technologies to give you enhanced performances in case of a fall.

MATERIALS

Mix of materials incorporating Kevlar® fibre. For an optimised mono layer of protection against abrasion, heat and cut across the entirety of the trousers.

The Chino Armalith® is the result of development between Furygan MotionLAB and Armalith®, a revolutionary fibre armed with a UHMWPE core, which, when woven with cotton, produces a single-layer fabric that is ultra-resistant, flexible and without being bulky. Equipped with D30® Ghost™ protectors at the hips and knees, the Chino Armalith® is a pair of trousers designed for everyday use, but with all the properties of real motorbike gear.

PROTECTION

D30® Ghost™ knee and hip protectors. Designed as fit and forget armour, the D30® Ghost™ is made with the revolutionary new Impact Print™ technology from D30® which allows for unrivalled freeform geometry and flexibility.

Armoured monolayer. Each Armalith® yarn is reinforced with a core of UHMWPE, a high-performance fibre. This integrated reinforcement absorbs, distributes and resists abrasion during a fall, offering effective protection without rigidity or bulkiness.

ERGONOMICS

Zip fly.

Freedom of movement. Despite its high strength, Armalith® remains a flexible, breathable and lightweight material. It offers the comfort of classic trousers and total freedom of movement.

4 outside pockets.

Adjustable knee protectors.

Tapered cut. This cut starts out loose in the pelvis and narrows towards the bottom. Maintains the comfort that is essential for two-wheelers, while at the same time enhancing the silhouette.

Stretchable material. For maximum ease of movement on your bike, and in everyday life.

CLIMATE

Mono layer external construction. Allowing better air flow in summer.

Cotton-Armalith® weave. This combination offers the breathability of classic trousers, ideal for summer temperatures. It lets air pass through without exposing the skin, while incorporating technical performance designed for all motorcyclists.

MATERIALS

Armalith® Armalith® incorporates UHMWPE (ultra-high molecular weight polyethylene), a fibre derived from the aerospace industry. Woven with cotton, it produces a single-layer fabric that is ultra-resistant, stable and built to last.

Furygan

Furygan X Kevlar™

The association of our know-how as a designer of protective clothing for motorcyclists, with one of the most resistant fibres in the world, invented by DuPont, was obvious. The Kevlar® fibre, integrated into our textiles, defines a new standard for abrasion resistance and the mix between protection and comfort.

To learn more about our partner scan the code.

ABRASION AND PUNCTURE RESISTANCE

Kevlar® fibre, when incorporated into textiles, increases impact abrasion resistance, reduces wear, provides puncture protection and tear resistance.

5X

Kevlar® fibre is five times stronger than steel (weight for weight), providing lightweight strength without sacrificing performance or protection.

HEAT RESISTANCE AND DURABILITY

Kevlar® is a unique fibre capable of withstanding fire and heat, providing protection when you need it. Solid and robust. Kevlar® fibre retains its high performance qualities, such as tensile strength, even after repeated stressing and straining.

EXCLUSIVE SINGLE-LAYER MATERIALS

Furygan and Kevlar® have collaborated to develop, according to the particular specifications of motorcycle protective clothing, several innovative single-layer materials.

MATERIALS

High tenacity Polyester. Polyester with a weight of 600 deniers or more (thin tights weigh about 10 deniers). With at least one coating to hold the fibres together, PHT offers greater resistance than standard polyester.

Polyurethane.

The Tonik is a pair of technical motorbike shoes that focus on comfort. Inspired by the world of trail running, they have an EVA midsole that absorbs shocks and vibrations, making them ideal for long journeys. They're also protective, with D30® reinforcements in the ankle and an abrasion-resistant coating on the front and sides of the shoe. The lightweight, flexible Michelin® outsole provides excellent grip and allows a stable and dynamic position on the footpegs, thanks to an 8mm drop. A true '4x4' shoe, they can be adapted to suit your aesthetic and your ride, as long as you're looking for a pair that can do it all.

CLIMATE

Waterproof and breathable insert.

Water-repellent material. This product slows down the infiltration of humidity and limits the creation of a thermal bridge that would accelerate the transfer of the cold to the body.

Mid-season lining. Made of brushed knit fabric, it helps to retain warmth and provides soft comfort without compromising the feel of the levers.

PrimaLoft® Gold padding. The PrimaLoft® family of insulation products is widely regarded as the best performing on the market, offering comfort and protection in a variety of climatic conditions. PrimaLoft® Gold is the version for the most extreme conditions.

MATERIALS

Goat leather. Combining suppleness and resistance, goat leather provides first-rate protection, while offering an unrivalled feel for the handlebars.

Polyester.

Micropolar lining. Appreciated for its fluffy feel that provides exceptional warmth, the brushed texture of the fleece lining offers exceptional comfort when temperatures drop.

Polyamide. Known for its resistance to abrasion and tearing, polyamide is the material of choice for protective clothing for motorbike users.

AW25

Designed for exploring, the Balmaz All Seasons offer flexibility and protection thanks to an innovative side stretch and ergonomic palm reinforcement inspired by competition. Their hard-wearing, rough-textured material guarantees a flawless grip throughout your road-trip. Built for adventure, built to last.

PROTECTION

100% leather palm.
Palm and finger reinforcements.
Metacarpal shell protectors.

Palm sliders. Reinforces the glove in an area prone to impact and abrasion, while allowing the hand to slide on the ground, reducing the risk of scaphoid fracture or damage to the arms and shoulders.

ERGONOMICS

Materials, a hybrid mix. The material mix provides a superior stage of comfort, while offering a high level of protection on the exposed zones during a crash.

Stretches on fingers. For optimum mobility when manipulating the controls.

Fit control. An elastic cuff adjustment system allows for a precise fit with each use.

Furygan Sensitive Science insert. An insert specifically developed to allow touch screen use (GPS, smartphones) without removing your gloves.

CLIMATE

Waterproof and breathable insert.

Water-repellent material. This product slows down the infiltration of humidity and limits the creation of a thermal bridge that would accelerate the transfer of the cold to the body.

Furygan X THINDOWN®

Furygan has teamed up with Thindown®, a revolutionary technology, to take protection against the cold even further.

Proud to bring this innovation to motorbike equipment for the first time, Furygan, in partnership with Thindown®, has selected a natural wadding created from the finest parts of down, the best thermal insulator available.

Its ultra-fine design provides exceptional thermal performance, thanks to the specific architecture of the down, which traps air, remains breathable and maintains an ideal body temperature. Its effect is constant, preventing the formation of cold spots through compression or displacement.

To learn more about our partner scan the code.

1ST.

Thindown® is the world's first down wadding.

2X.

BETTER THERMAL INSULATION

Independent laboratory tests have proven that Thindown® down is 2x warmer than standard down, and 4x warmer than synthetic down.

NATURAL AND ECO-RESPONSIBLE

Thindown® is natural and eco-sustainable, made exclusively with traced down, RDS certified or post-consumer recycled, GRS (Global Recycled Standard) certified.

ACTIVE MATERIAL

Thindown® wadding is active thermal insulation. It is activated by body movements and generates heat, unlike polyester which is a passive thermal insulator.

WITHOUT HEAT LOSS

Unlike traditional down, which needs containment seams to hold it in place, creating thermal bridges, Thindown® is a continuous wadding with no cold spots.

ENHANCED SENSATIONS

Thindown® offers all the natural benefits of down in an ultra-thin thickness, making it possible to reduce the thickness of the most technical motorbike equipment, and achieve a fit and sensitivity previously impossible with winter products.

THINDOWN® is sourced exclusively from ecological farms, guaranteed free from animal abuse.

THINDOWN® is a by-product of the food industry, making it a natural product with low environmental impact.

THINDOWN® IS RDS CERTIFIED
(Responsible Down Standard)

This 100% natural down wadding made from virgin down is guaranteed to be ethically sourced.

THINDOWN® is 100% traceable and environmentally friendly.

THINDOWN® is certified OEKO-TEX class 1. The wadding is certified free from harmful or toxic substances, and guarantees effective protection for bikers of all ages.

THINDOWN® is a by-product of the food industry, making it a natural product with low environmental impact.

the product
video.

GOOD TO KNOW

- › With a unique light signature, and a number of features that can be controlled and customised with the «MyFury Connect» application, the Furygan Heat X Kevlar® has been meticulously thought through to the end.
- › The programming of the Heat X Kevlar® has been optimised to obtain an optimal heating / autonomy ratio.

Equipped with an innovative and unique heating system, developed in partnership with Kevlar® engineers, the latest Furygan heated gloves offer a new experience. At the heart of this product, a fabric incorporating Kevlar® fibres captures and evenly distributes heat while protecting the hand. Heat is generated by a double wire running from the back of the hand to the fingertips, and its heat transfer is spread by the Kevlar® as well as a touch of carbon - a smart conductor - present in the weave. This energy is captured by Furygan in a glove made of leather and softshell material, designed to retain heat as close as possible to your skin, delaying humidity thanks to the 37.5®, and protecting your hands in case of a hard blow.

PROTECTION

- 100% leather palm.
- D30® metacarpal protectors.
- Palm reinforcements with high tenacity microfibres.

ERGONOMICS

- 1-click mode.** To control both gloves via a single ergonomic and illuminated button, easily operated with one hand while riding.
- Auto-regulation mode.** Thanks to a temperature sensor, the Heat X Kevlar® can regulate the temperature of your choice, according to the instructions set in the «MyFury Connect» application.
- Smart Move mode.** Save your batteries by selecting one of the three automatic start and standby modes that will work in synchronisation with the accelerometer included in your gloves.
- Heat indicator.** readable at a glance via a configurable indicator light.
- MyFury Connect compatible.** Access to an easy-to-use dashboard, program, control, refine and optimise your gloves thanks to the MyFury Connect app for IOS and Android.
- 12V compatible.** Thanks to the Furygan optional cable, you can connect your gloves to the 12V battery of your motorbike and boost your autonomy.
- My Heat mode.** Customise your heating modes in intensity, number (up to 5), and colours thanks to the free MyFury Connect app.

- Waterproof and breathable insert.**
- Dual Lining.** Thanks to materials chosen for their insulation and breathability properties, the back and palm of the hand are differentiated to better respond to the specificities of riding in cold weather, without affecting the feel of the handlebars.
- 37.5®.** The active 37.5® particles, permanently integrated into the weave, give our fabrics an extraordinary capacity to capture and clear humidity by acting with the body like a natural thermostat.
- ColdMaster®.** For the warmest clothing designed for motorcycling. ColdMaster® is the Furygan label for garments equipped with our best technologies and offering the highest performance against the cold.
- Unique and exclusive heating system.** Double wire heating system embedded in a weave based on Kevlar® and carbon fibres, which conducts, channels and then homogenises heat diffusion on the whole glove's surface.

MATERIALS

- Goat leather.** Combining suppleness and resistance, goat leather provides first-rate protection, while offering an unrivalled feel for the handlebars.
- 3 layer softshell fabric.** This 3-layer fabric is waterproof and windproof, without compromising on comfort. Flexible and breathable, it promotes freedom of movement without compromising the rider's protection and while preserving body heat in all conditions.

Often copied, never equalled. Now available in an Evo version to perpetuate the legend and keep motorcyclists happy. The Jet D30® Evo is the essential motorbike glove: flexible, lightweight, ventilated, yet complete. Goat leather palm, D30® technology to protect the metacarpals, and Furygan Sensitive Science to control your screens without removing your gloves. It's all there.

PROTECTION

100% leather palm.

Palm reinforcements.

D30® metacarpal protectors. D30® is a very soft material where molecules lock in the event of an impact to absorb kinetic energy. This technology makes it possible to create soft, ergonomic and top performing protectors for more security and comfort.

ERGONOMICS

Materials, a hybrid mix. The material mix provides a superior stage of comfort, while offering a high level of protection on the exposed zones during a crash.

Precise wrist tightening. For gloves that always fit perfectly.

Stretches on fingers. For optimum mobility when manipulating the controls.

Furygan Sensitive Science insert. An insert specifically developed to allow touch screen use (GPS, smartphones) without removing your gloves.

CLIMATE

Vented. For air flow to cope with rising temperatures.

MATERIALS

Goat leather. Combining suppleness and resistance, goat leather provides first-rate protection, while offering an unrivalled feel for the handlebars.

Polyamide. Known for its resistance to abrasion and tearing, polyamide is the material of choice for protective clothing for motorbike users.

Polyester.

The ADV 20L+ is a modular 20-litre motorbike rucksack that combines storage capacity, support, comfort and versatility. It has two removable pouches to adapt its capacity to the needs of each outing. In case of bad weather, an integrated rain cover keeps your personal belongings out of harm's way. The ventral fastening system and extra-wide shoulder straps ensure a perfect fit while riding, making your journeys comfortable even when the bag is being used to its full capacity. Upgrade to the new generation of Furygan backpacks.

ERGONOMICS

- Capacity: 20 litres.**
- Double-adjustable shoulder straps.** Adjustable at the top and bottom, so you can tailor the position and tightness of your bag to your body shape.
- Multiple compression straps.** Allows you to adjust the volume of the pack and optimise its stability on your back, even in action.
- Removable phone pouch.** Padded for optimum protection, this 9x11 cm pocket holds a wide range of smartphones. Attached to the bag's shoulder strap, it's easily accessible even when wearing gloves, and secured with a snap hook.
- Additional removable pouch.** Spacious and robust, this 22x16 cm pouch keeps essentials close to hand without having to open the bag.
- Numerous webbing.** Securely attach your accessories and stay operational in all conditions, on and off the road.
- Airbag compatible.** Thanks to an ingenious system of elastic inserts on the shoulder straps, this bag is 'airbag compatible', even when worn close to the body.

- X-Shaped shoulder straps.** The design of the shoulder straps ensures optimum comfort and a perfect fit, without ever getting in the way of your riding, whatever your position.
- Padded laptop compartment** suitable for a 15" laptop screen.
- Height and width adjustable chest strap.**
- Adjustable waist strap.**
- Ergonomic back and shoulder straps.** Padded and designed to provide comfort and air circulation.

CLIMATE

Integrated rain cover. This bag has a pocket that reveals a rain cover to protect your belongings from water.

FuryTECH

Furygan X 37.5

Thanks to the Furygan X 37.5® partnership, we now offer the best in terms of moisture wicking and dry keeping in our motorcycle clothing.

Motorcyclists who have chosen a Furygan X 37.5® product are now ready to face any climatic situation in optimal riding comfort and whatever the level of intensity of the practice.

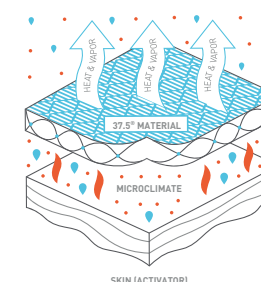

To learn more about our partner scan the code.

AN INNOVATIVE, ACTIVE AND NATURAL TECHNOLOGY

37.5® is a thermoregulation technology that interacts with the body and wicks away moisture. It is made up of natural active particles from volcanic rocks. 37.5® technology preserves your comfort by helping your body stabilize your humidity level close to your skin at 37.5%.

A CONSTANT TEMPERATURE

The 37.5® active particles, permanently integrated into the weave, give our fabrics an exceptional ability to capture and evacuate moisture by acting with the body like a natural thermostat. 37.5® technology helps warm you up when you're cold and cool you down when it's hot.

PERFORMANCE IN ALL CIRCUMSTANCES

37.5® natural thermoregulating active particles keep the body dry and at a comfortable temperature whatever the climate and activity level. Furygan gear with 37.5® technology has been proven to decrease the rate of core temperature buildup, increasing athletic performance by up to 26%.

SUSTAINABLE EFFICIENCY

37.5® is a technology whose effectiveness is stable over time, despite washing. No chemical treatment is done, it is natural particles mixed in the base which is used to manufacture the threads which will give rise to our wadding and linings. 37.5® technology is patented and effective throughout the life of the product.

An underwear for bikers who want to optimise their riding experience. The 37.5® keeps the body dry whatever the climate and level of intensity. The compression zones and seamless design provide perfect support and eliminate chafing. A must-have as soon as the summer heat sets in.

ERGONOMICS

Seamless. Seamless design for a perfectly smooth, snug fit all over the body. This process guarantees superior comfort, without discomfort or skin irritation from rubbing during intense activity.

Compression zones. The design includes zones with different levels of elasticity. The benefits are a sheathing effect and support for the body in all movements.

Ergonomics derived from Racing. Design based on the ergonomics developed for our world's best racers.

Ultra stretchable sides. To allow a perfect fit thanks to its superior elasticity.

Ergonomical design. For a garment that fits perfectly, the selection of materials as well as the assembly techniques and the layout of the cut-outs have been designed to provide maximum performance without ever creating any discomfort when worn.

Quick drying material. Designed with materials with a high capacity to dry quickly, to avoid uncomfortable residual moisture sensations.

CLIMATE

37.5®. The active 37.5® particles, permanently integrated into the weave, give our fabrics an extraordinary capacity to capture and clear humidity by acting with the body like a natural thermostat.

An underwear for bikers who want to optimise their riding experience in winter. The 37.5® keeps the body warm and dry, whatever the climate or level of intensity. The weave and distribution of fibres in specific zones make the Active Long Sleeves Thermo 37.5® both breathable and insulating. Its seamless design ensures a perfect fit and eliminates chafing. Thermal comfort you'll appreciate as soon as the first winter chill appears, and a must-have for coping with the most extreme temperatures.

X-ROAD SHORT D30®

• Black / 7862-1

79,9 €

S - 2XL

With the products in the X-ROAD range, immerse yourself in a world of multi-purpose, multi-discipline protection. Ventilated, ergonomic and designed in partnership with D30®, they are equipped with the best anti-impact technology and benefit from tailor-made ergonomic development by the Furygan MotionLAB.

PROTECTION

D30® Coccyx Protector. D30® is a very soft material where molecules lock in the event of an impact to absorb kinetic energy. This technology makes it possible to create soft, ergonomic and top performing protectors for more security and comfort.

D30® reinforcements on thighs. Placed on the outside of the thighs, these reinforcements use D30® Aero technology for reduced weight and first-rate flexibility.

D30® hip protectors. D30® is a very soft material where molecules lock in the event of an impact to absorb kinetic energy. This technology makes it possible to create soft, ergonomic and top performing protectors for more security and comfort.

ERGONOMICS

Anti-slip silicone strips. Silicone inserts to keep the garment in place without the risk of a tourniquet effect.

Comfort foam in crotch. 0

Stretchable material. For maximum ease of movement on your bike, and in everyday life.

Waist stretch. Allows for an optimal adjustment to your body shape.

Ergonomical design. For a garment that fits perfectly, the selection of materials as well as the assembly techniques and the layout of the cut-outs have been designed to provide maximum performance without ever creating any discomfort when worn.

Quick drying material. Designed with materials with a high capacity to dry quickly, to avoid uncomfortable residual moisture sensations.

CLIMATE

Mesh. The Mesh, present in large panels and optimally placed, allows for increased airflow through the garment, and maximum breathability.

MATERIALS

Mesh.

D30®. The D30® range of materials includes over 30 different formulations. The polymer blends used in partnership with Furygan offer exceptional impact protection, comfort and flexibility.

- › With 6,6kg square steel base.
- › Suitable for indoor and outdoor use thanks to its specially designed dimensions.

Get ready to rev up your motorbike events with the Furygan beach flag featuring the iconic panther emblem! Perfect for open days and gatherings, this eye-catching Furygan Flag is easy to set up and guarantees maximum visibility. Whether it's at the entrance to your shop or in your Furygan equipment corner, it's sure to grab attention and make people stop in their tracks!

FURYGAN CURTAIN

● Black / 8621-1

Add a touch of elegance to your fitting rooms with the Furygan curtain, in intense black and adorned with the panther logo. Designed to fit perfectly in your changing rooms, it can be installed without dragging on the floor, guaranteeing optimum hygiene. Its 4 cm eyelets allow the curtain to pass smoothly over the bar, making fittings both functional and pleasant. This curtain combines aesthetics and practicality for a chic fitting area.

GOOD TO KNOW

- › Dimensions: 170 x 180cm.
- › Durable material.
- › 40mm-diameter eyelets allow fabric to pass smoothly and quickly over the fitting room bar.

GATE DISPLAY

● Black-White-Red / 8655-169

Enhance the entrance to your shop with a cardboard display for anti-theft gantries! It's easy to unfold and install, instantly transforming your plain gantries into an inviting, dynamic space that will catch the eye of bikers. Brighten up your shop and give your customers a positive first impression in the blink of an eye!

GOOD TO KNOW

- › Dimensions: 40x8x150cm.
- › A quick and easy way to liven up the entrance to your shop.
- › Each card has a white 'Rider entrance' side and a black 'Rider exit' side.

GLOSSARY

D30®, the highest level of protection.

A very soft material where molecules lock in the event of an impact to absorb kinetic energy. This technology makes it possible to create soft, ergonomic and top performing protectors for more security and comfort.

D30® Ghost™

Designed as fit and forget armour, the D30® Ghost™ is made with the revolutionary new Impact Print™ technology from D30® which allows for unrivalled freeform geometry and flexibility.

Furygan D30® Spectre Concept.

The result of an exclusive development between Furygan and D30®, the Spectre has redefined the standards for flexibility and breathability. An extreme ergonomic achievement, capable of 'disappearing' on the move, only to be revealed again on impact.

D30®, Level 2.

Certified to exceed the performance requirements of EN1621-2, level 2.

Chest protector pockets.

Designed to fit the Furygan D30® chest protectors.

D30® Chest protectors included.

Back protector pocket.

Designed to fit the Furygan D30® «Full Back Fury» level 2 back protector.

D30® level 2 back protection included.

D30® is a very soft material where molecules lock in the event of an impact to absorb kinetic energy. This technology makes it possible to create soft, ergonomic and top performing protectors for more security and comfort.

Kevlar®.

Tough external material built in partnership with Kevlar®.

Armalith®

Armalith® incorporates UHMWPE (ultra-high molecular weight polyethylene), a fibre derived from the aerospace industry. Woven with cotton, it produces a single-layer fabric that is ultra-resistant, stable and built to last.

In&motion®

Furygan's technological partner for the airbag system and accessories. In&motion develops the algorithm integrated into the casing of all Fury Airbags.

Furygan Skin Protect lining.

A three-material design, studied to strategically optimise the resistance of the areas most stressed during a fall, while preserving comfort.

Reflective inserts.

Retro-reflective inserts to improve visibility in the dark.

37.5°.

The active 37.5° particles, permanently integrated into the weave, give our fabrics an extraordinary capacity to capture and clear humidity by acting with the body like a natural thermostat.

Thindown® Pure White Duck down padding.

Natural and responsible down padding (RDS), guaranteeing thin but highly effective insulation. Its design offers consistent performance over time, preventing cold spots from forming through compressions and displacements.

Waterproof and breathable Humax® membrane.

Inserted in the heart of the garment, our Humax® membrane keeps you dry, while contributing to the clearance of moisture generated by your body.

ColdMaster®.

For the warmest clothing designed for motorcycling. ColdMaster® is the Furygan label for garments equipped with our best technologies and offering the highest performance against the cold.

NEW

Developed by the Furygan MotionLAB, DRYCORE technology protects motorcyclists from the elements.

Furygan DRYCORE Genesis.

DRYCORE Genesis offers essential protection against rain and wind thanks to technical, lightweight and high-performance materials.

Furygan DRYCORE Absolute.

DRYCORE Absolute pushes back the limits of protection to withstand intense weather conditions, without compromising on comfort and performance.

Furygan DRYCORE Pro.

DRYCORE Pro embodies the highest level of our expertise: maximum protection, exceptional breathability and premium materials dedicated to extreme conditions.

2W1 liner.

A thermal, waterproof, breathable and removable liner.

Waterproof membrane.

Breathable membrane.

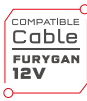

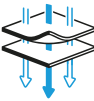

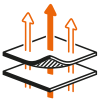

Vented.

MyFury Connect compatible.

Access to an easy-to-use dashboard, program, control, refine and optimise your gloves thanks to the MyFury Connect app for iOS and Android.

12V compatible.

Thanks to the Furygan optional cable, you can connect your gloves to the 12V battery of your motorbike and boost your autonomy.

4-way stretch.

For maximum ease of movement on your bike, and in everyday life.

Straight cut.

The straight cut is designed to be comfortable in all circumstances, and to fit most body types. The cut is straight on the entire leg without tightening at the bottom, which facilitates the insertion of boots.

Slim cut.

A close-fitting cut that remains comfortable thanks to the stretch in the denim. It fits the hips, moulds to the thighs and becomes narrower at the ankles.

Tapered cut.

This cut starts out loose in the pelvis and narrows towards the bottom. Maintains the comfort that is essential for two-wheelers, while at the same time enhancing the silhouette.

Coupe mom.

Inspired by the 80s and 90s, the Mom cut features a high waist and a straight, loose fit at the hips and thighs. It offers maximum comfort while riding, while remaining fashionable.

Furygan Sensitive Science insert.

An insert specifically developed to allow touch screen use (GPS, smartphones) without removing your gloves.

Goat leather.

Combining suppleness and resistance, goat leather provides first-rate protection, while offering an unrivalled feel for the handlebars.

Cow leather.

100% Buffalo leather.

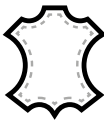

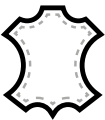

A noble leather with an incomparable softness and feel.

PFC free.

Water repellant treated and PFC free. For a resistant, yet waterproof, light and comfortable jacket.

Johann Zarco #5.

Official merchandising, designed and conceived in collaboration with Johann and his team.

Developed for children.

Ergonomically designed garment specifically for younger children.

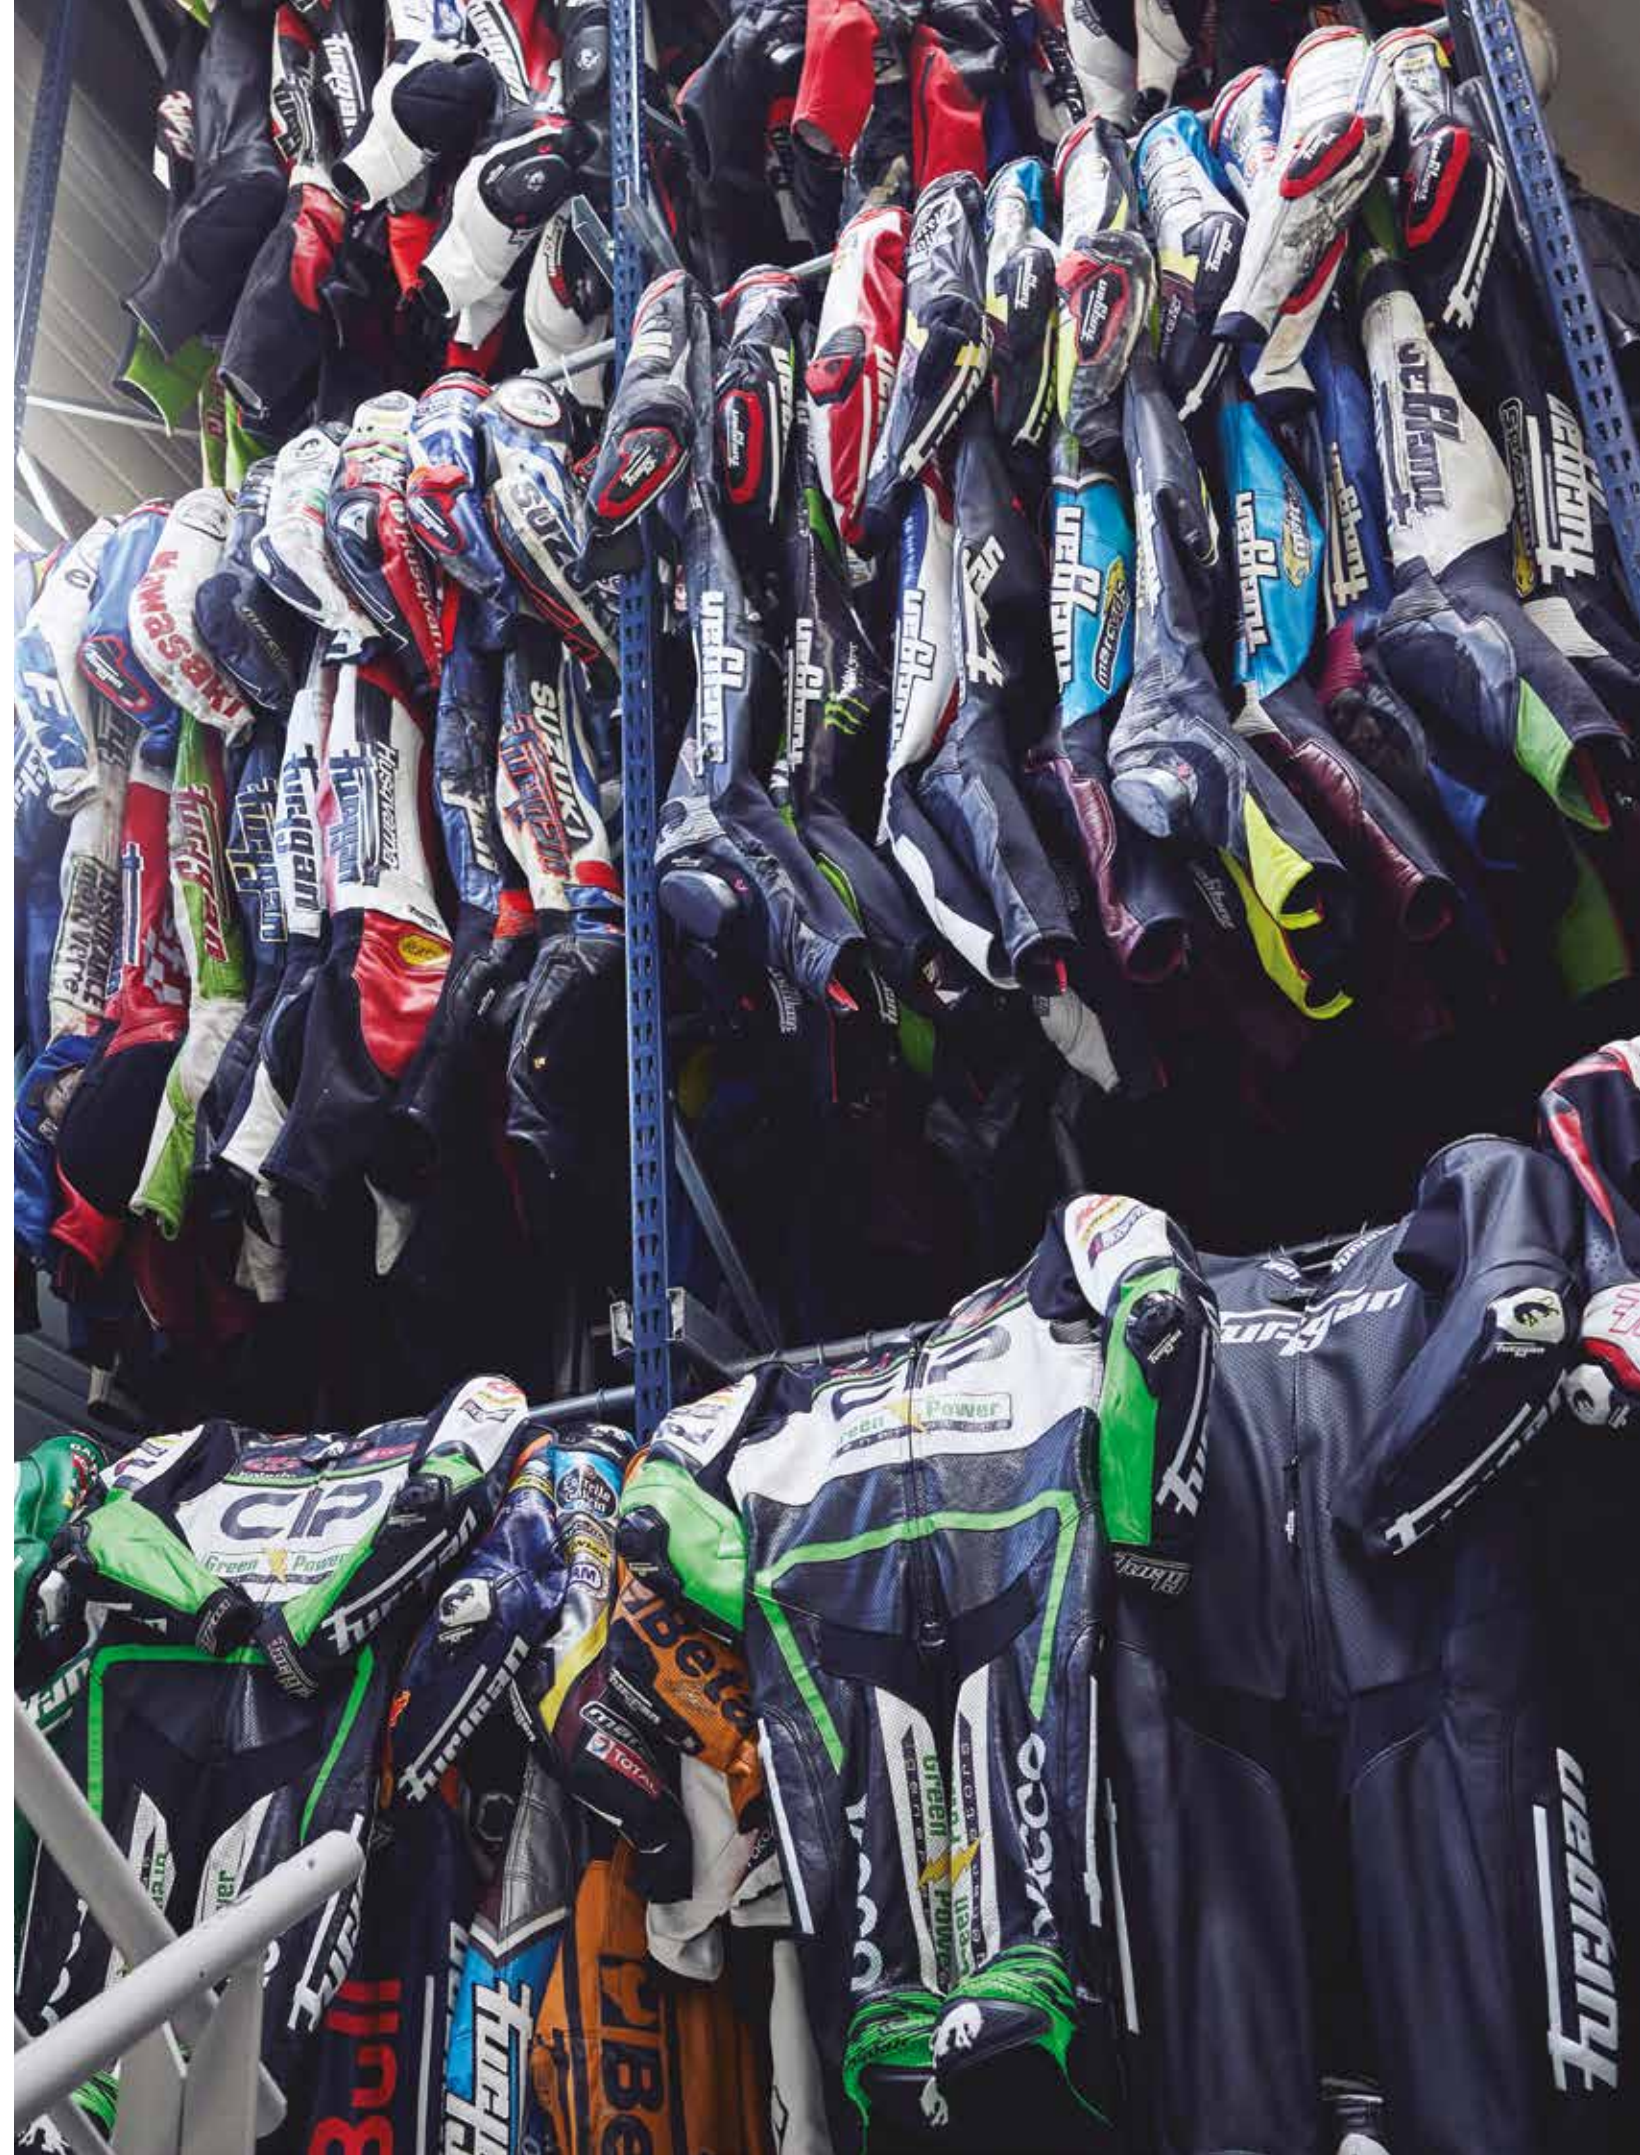

RDS.

Responsible Down Standard. European certification guaranteeing the ethical sourcing of the duck feathers used in our gloves.

In&Out Concept.

The Furygan In&Out membrane can be worn over any certified motorbike garment. Its design makes it compatible with our «Vented+» range of jackets, into which it fits thanks to the zips already present.
